

YEAR 2020-21: YEAR OF ACHIEVEMENT **AND VIRTUALITY**

TRAINING SESSIONS

CERTATUS has held a number of training sessions cum workshops and team meetings in the year 2020-21. The meetings have specifically focused on the training of new members and polishing their existing skills as well as inculcating new abilities to be a good MUNer. MUN sessions require various skills to function as different operatives as delegates, executive board members and IP members. Sessions aimed at developing the members as good diplomats and debaters as well as sharpening their wits and analytical and researching skills.

It would be gratifying to say that the sessions have turned out to be a good experience for the members as they performed well in the MUN Circuit, and even received recognition at some of the very respectable conferences, boosting our name. The society has only been moving forward as a team and the confidence that sessions lit in the members has pushed them to come out of their comfort zones and compete in the earnest to learn and grow as better persons.

There were a total of 10 sessions that were held in this season and they all were attended by members with great enthusiasm and zeal. The sessions drew weaker skills of members in light and were dealt with immediate attention and competence. Topics of the sessions were all the more drawing as they provided for a lot of scope and allowed a good and formalised debate testing their wits and forcing them to improvise. We believe we could say the sessions were worth the bit.

The support of our convenors and their ever helpful and guiding hand was also very encouraging for the members and persuaded them to dedicate as much as possible for the betterment and further growth of society.
