

# **Workshop on Holi Photography**

**10<sup>th</sup> March 2019**

## **Brief Report**

A Workshop cum photowalk was organized by Photobug for its members on March 10, 2019. The workshop was aimed at helping members enhance skills for capturing portrait photographs. The use of Holi colours helped in capturing creative and visually pleasing photographs.

Society members gathered at Lodhi garden at 8:00 am. The help of four student volunteers was also taken who agreed to pose as models using Holi colours. Senior members Gundeep Singh and Harmeet Singh lent their expertise to junior members and helped them with clicking vibrant portrait photographs. The members learnt to use manual settings of aperture, focal length and shutter speed for capturing the photos. The workshop culminated at 11 am after which the members had lunch and dispersed.

Eleven members of the society participated in this useful workshop, as they honed their skills in portrait photography.
