

Photography Training session

10th April 2021

Brief Report

A fascinating online training session was organised by the Photobug Society on 10th April 2021. The society invited Mr Harmeet Singh, Photobug alumni (batch 2019) whose exceptional creative skills has widened his horizon as a photographer. His exemplary performance in this art has helped him in his journey afterwards.

The session started with the members sharing their personal experiences and skills as a part of the group discussion. This facilitated in making the online session much more interactive. This was followed by a discussion regarding the manual mode of photography and the various parameters that should be considered for composing the pictures. The members got an amazing opportunity to learn about new features and ways to make their photographic experience more creative.

After this, an evaluation session was conducted by Harmeet Singh for reviewing the pictures clicked by the members of the society. He reviewed everyone's pictures with dire precision and perfection. His reviews helped the members in understanding the ways which can help them improve themselves.

This session proved to be a complete success as everyone learnt a myriad of new skills and gained invaluable expertise. We are looking forward to hold more such sessions by inviting alumni of the society to share their knowledge, thus helping us to continue improving our photography skills.
