Introduction to speaker	Hardik Chhabra		
TISP SIT	YOT		
Main idea	The following aspects were covered: Understanding technical analysis: Technical analysis is a method of evaluating securities based on statistics and charts, rather than fundamental analysis. The basic principles of technical analysis, such as chart patterns, technical indicators, and candlestick patterns were discussed.		
	Identifying trends : One of the primary goals of technical analysis is to identify trends in the

Chart patterns: Technical analysis relies heavily on chart patterns, which are visual representations of price movements over time. The students learnt how to identify different chart patterns, such as head and shoulders, triangles, and flags, and how to use them to predict future price movements. Technical indicators: There are numerous technical indicators that traders use to analyze market trends and make trading decisions. The students learnt about popular indicators like Moving Averages, Relative Strength Index (RSI), and Fibonacci Retracements. Risk management: Technical analysis is not foolproof, and there is always a risk of losing
E L	money in the financial markets. The seminar focussed on risk management strategies, such as setting stop-loss orders and position sizing, to help mitigate your losses.
A CRUERSIT	Trading psychology: Successful trading requires a strong mindset and discipline. The speaker discussed the importance of having a sound trading psychology, and provide tips on how to maintain a positive attitude and avoid emotional decision-making.
