

**Report on Mentoring Session
February 28, 2022**

A Mentoring Session for all the students of Sri Guru Nanak Dev Khalsa College was organised on Monday, 28th February 2022, at 9:50am in the college premises. It was the first offline interaction between mentors and the mentees post pandemic. Previously the sessions were held online, however, in-person meetings have an advantage of additional emotional connect.

Separate themes were decided for students of each semester to take care of their individual problems. Students of semester 1, were familiarised with the process of OBE exams, since they will be facing these exams for the first time. Semester 4 students were mentored on how to handle Physical exams in college. The second-year students will take pen and paper exams in college for the first time. Whereas semester 6 students were guided on their journey forward. The motive was to provide any support and guidance for their smooth transition to physical mode of college and after college.

Both the mentors and mentees had participated enthusiastically and made the event a huge success. At the end, feedbacks were collected from both. It will be analysed to make further improvements in the process.
