Rise of the Modern West – I	4	3	1	0	12 th Pass	NIL

Learning Objectives

The focus of the course is on transition from feudalism to capitalism in Europe. The paper familiarizes the student with important transitions and transformations in the economy, polity, and socio-cultural life from mid fifteenth century to 1600 in various parts of Europe. The course shall critically examine the dynamics of economic and political power within Europe, and contacts with the New World. The processes by which Europe's economy benefited from colonial expansion and exploitation of indigenous and slave labour will be explained. Students shall also engage with continuities and changes in intellectual and artistic realms; the social and economic milieu which influenced developments in religion; trends in state formation; and the relation-ship between state and religion. Students will be introduced to the concept of Eurocentrism in our understanding of the Rise of the Modern West.

Learning outcomes

On completion of this course students will be able to:

- Outline important changes that took place in Europe from the mid fifteenth century.
- Acquire an integrated approach to the study of economic, social, political and cultural developments in Europe.
- Explain the processes by which major transitions unfolded in Europe's economy, state forms, social structure and cultural life. Examine elements of early modernity in these spheres.
- Critically analyse linkages between Europe's State system and trade and empire.

History of Modern China (1840 – 1950s)	4	3	1	0	12 th Pass	NIL

Learning Objectives

The course studies the transformation of China from an imperial power into a modern nation taking its place among a constellation of world powers. This transition has been studied in the context of the impact of a specific form of western imperialism on China and the country's numerous internal fissures and contradictions. This paper seeks to focus on a range of responses to the tumultuous changes taking place: various strands of reform (from liberal to authoritarian), popular movements, and revolutionary struggles. It facilitates an understanding of the multiple trajectories of China's political and cultural transition from a late imperial state, to a flawed Republic, to the Communist Revolution led by Mao Tse Tung. The paper shall expose students to historiographical debates pertaining to each of these themes, keeping in mind historical and contemporary concerns centred on such issues.

Learning outcomes

Upon the completion of this course the student shall be able to:

- Develop an in-depth understanding of China's engagement with the challenges posed by imperialism, and the trajectories of transition from feudalism to a bourgeois/ capitalist modernity.
- To locate these historical transitions in light of other contemporaneous trajectories into a global modernity, especially that of Japan.
- Analyse significant historiographical shifts in Chinese history, especially with reference to the dis-courses on nationalism, imperialism, and communism.
- Investigate the political, economic, social and cultural disruptions caused by the breakdown of the centuries old Chinese institutions and ideas, and the recasting of tradition to meet modernist challenges.
- Comprehend the genesis and unique trajectories of the Chinese Communist Revolution.
- Locate the rise of China and Japan in the spheres of Asian and world politics respectively.

SYLLABUS OF DSC-3

Unit I: Late Imperial China and Western Imperialism

1. Confucian Value System; Society, Economy, Polity
2. Opium Wars and the Unequal Treaty System (9 lectures)

Unit II: Popular Movements and Reforms in the 19th century

1. Taiping and Boxer Movements – Genesis, Ideology, Nature
2. Self-Strengthening Movement; Hundred Days Reforms of 1898 (13 lectures)

Unit III: Emergence of Nationalism

- The Revolution of 1911: Nature and Significance
- The May Fourth Movement of 1919 (10 lectures)

Unit IV: Communist Movement in China

1. 1921-1927: Formation of the CCP and the First United Front

2. 1928-1949: Evolution of Maoist Strategy and Revolutionary Measures in Kiangsi and Yenani ; Communist victory (13 lectures)

Global Environmental History	4	3	1	0	12 th Pass	NIL

Learning Objectives

The objective of this course is to introduce the students to the emerging field of global environmental history. It will explore the transformations in the relationship between society and nature in various places and various time periods around the world. Drawing on environmental, political ecology, and historical geography studies perspectives, the course will introduce the concepts, methods and ideas of global history. Moving beyond regional and national scales of analysing historical processes, the following units elaborate the global interconnectedness of socio-environmental histories. The course adopts a chronological approach to address issues such as human interactions with other living species, modes of resource use, technologies of energy harnessing, migration, modes of transportation, nature protection, pollution, use of fossil fuel and carbon emission, and global warming, among others. Each unit focuses on a general period in history, based on major patterns and large-scale changes in the relationship between societies and the natural world. The role of human agency and unequal power relations in organizing, exploiting, and transforming the natural world will be the central focus of the course. This will enable students to critically assess how historical experiences provide insights in understanding what is happening to human-nature interactions today and to explore ways to achieve socially inclusive ways of addressing climate crisis.

Learning outcomes

Upon the completion of this course the student shall be able to:

- Understand the interconnected histories of the relationship between social formations and environmental transformations around the globe from prehistory to the present.
- Critique an understanding of environmental concerns based on a narrow scientific/technological perspective
- Discuss environmental issues within a socio-political framework.

- Identify the historical roots of current climate crisis.
- Apply interdisciplinary methods of Humanities and Social Sciences to understand the past.
- Examine the role of social inequality, i.e., unequal distribution of and unequal access to environmental resources. This is critical in gaining an understanding of the environmental crisis of the world - from the global to the local
- Locate solutions to environmental problems within a framework of greater democratisation of resource use.
- Problematise the notion of a pristine past and of perfect balance between human societies and nature in pre-modern times.

SYLLABUS OF DSC-3

Unit I: Thinking Globally in the Era of Climate Crisis

1. What is Global Environmental History
2. Interdisciplinary Approaches: Archaeology, Anthropology, Historical-Geography, Political Ecology

Unit II: Ecologies of Subsistence in the Early Societies

1. Human-animal interactions
2. Pre-Industrial Prime Movers and Fuels

Unit III: Into the Early Modern Condition

1. Emergence of the European Empires as Ecological Process; The Columbian Exchange
2. Early Colonialism and Environmental Transformations of the small islands-St. Helena and Mauritius
3. Global Cooling and General Crisis in the Seventeenth Century.

Unit IV: Fossil Fuel, Capitalism, and Planetary Environmental Changes

1. Industrial Agriculture
2. Steam Ships and Hydraulic Engineering
3. Cities and Environment

Unit V: The Great Acceleration and the Anthropocene

1. Carbon Politics; the Middle East Crisis
2. Anthropogenic Natural Disasters; Fukushima
3. The Anthropocene Debate

Practical component (if any) - NIL

Essential/recommended readings

Unit I: This unit will introduce the important themes and perspectives within the emerging field of global environmental history. The readings and discussion will help

the students to understand the interdisciplinary methodologies developed by environmental historians to examine source materials. **(Teaching time: 9 hrs. approx.)**

Unit II: This unit provides an overview on the nature and dynamics of human interactions with the environment in the pre-modern world. By focusing on the changing technologies and modes of energy harnessing, the themes discussed in this unit expects the students to explore how the relationship of humans with the animals, plants, landforms and water bodies in turn shaped social relationships, ideas and beliefs. **(Teaching time: 9 hrs. approx.)**

Unit III: The first rubric of this unit explores how Empires of the New World transferred flora and fauna across continents, affected the demography of local societies and completely transformed landscapes. The second rubric explores how the colonial plantations resulted in rapid socio- environmental changes on oceanic islands, with special focus on the small islands-St. Helena and Mauritius. The third rubric explores the social and cultural impacts of the "Little Ice Age", or the global cooling that continued from the thirteenth through the eighteenth century, with special focus on interlinking climate change and the intensification of famines, and spread of epidemics in the seventeenth century. **(Teaching time: 9 hrs. approx.)**

Unit IV: This unit studies the new energy regimes of the modern world, with a special focus on industrialization and a major shift towards fossil fuel. It offers a historical perspective on the increasing inequality of access to natural resources, especially in the context of industrialisation of agricultural production, hydraulic engineering, urbanization of natural resources, and industrial pollution. **(Teaching time: 9 hrs. approx.)**

Learning Objectives

This course offers an overview of pre-colonial Southeast Asian history. It seeks to familiarise students with historiographical debates involving the construction of Southeast Asia as a region. It analyses processes of state formations, the impact of maritime activity on society and polity in the mainland and the archipelago. It focuses on the development and localization of religious traditions across a linguistically and culturally diverse region. The paper will require students to engage with recent developments in the historiography especially with recent research on aspects of social and political history, external influences on the region, architecture, urban history and its local histories. Through this the student will develop a clear and comprehensive understanding of different aspects of pre modern Southeast Asian history.

Learning outcomes

Upon the completion of this course the student shall be able to:

- Explain the processes of state formation, the localization and spread of religious traditions like Islam and Buddhism
- Analyse the impact of the European presence on local society
- Examine the impact of maritime activity of local society and polity and the developments in the economic and architectural history of the region.
- Discern the history of Populist and Progressive movements along with introduction of New Deal in response to the Great Depression.
- Describe the historiographical trends to study history of Southeast Asia

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Environment in Indian History	4	3	1	0	12 th Pass	NIL

Learning Objectives:

This course aims to introduce the students to the major themes in the environmental history of the Indian subcontinent. A historically informed understanding on how the past societies shaped the natural world shall enable the students to critically situate the environmental issues that we encounter at present. The issues include global warming, contestation over natural resources, changing land use patterns, human interaction with other living species, impacts of agrarian expansion, ecological consequences of imperialism, impacts of mega infrastructure projects, urban pollution, emergence of environmental justice movements and environmental regulations, changing ideas about the natural world, and gendered dimension of environmental degradation. The course has the following broad objectives: a) to introduce the historical studies that explores the long-term trajectories of man-nature interactions and revises the political history-based periodization of the sub-continent's past as self-contained ancient, medieval, and modern periods; b) to introduce interdisciplinary approaches- cartographic, geological, zoological, ecological knowledges -that helps historians study the crucial role played by ecology in the shaping of the past societies; c) to familiarize the students to the methods of using archaeological, bio and geo-archival sources, artistic depictions and oral history sources to study the past relationship between humans and the natural world. By the end of this course, the students are expected to develop an in-depth understanding of the interdisciplinary approaches to historical thinking and the significance of the environment in human history.

Learning Outcomes:

After completing this course, students should be able to:

- Understand the historical methodologies and concepts to explain the environmental contexts of the past social and cultural transformations.
- Develop a historical perspective on the complex relationship between society and nature from prehistory to the present in the context of the Indian subcontinent.
- Discuss how societies developed technologies, sources of energy, and modes of organizing lives to adapt to varied ecological landscapes.
- Discuss environmental issues within a socio-cultural framework.
- Examine the social, political and economic contexts of creating inequalities in resource use, with reference to the case studies regarding water rights, forest rights, and the right to have livable cities.
- Locate solutions to environmental problems within a framework of greater democratization of resource use.

Course Content:**Unit I:** What is Environmental History

1. Historiography and Sources
2. Interdisciplinarity

Unit II: Living with Nature

1. Environment and Early Urban Societies: Harappan Civilization
2. Beliefs, Practices and Natural Resources

Unit III: Era of Major Agrarian Expansion

1. Pastoralism, Agrarian Expansion
2. Forests and Tribal Groups
3. Irrigation and Canals

Unit IV: Colonialism and Transformation of Nature

1. Changing Land Use Patterns; Railway and Deforestation, Dams and Hydroelectric Power
2. Inland Waterbodies and Fisheries
3. Urbanization and Environment; Delhi

Unit V: Development, Environment, and Migration in Contemporary India

1. Big Dams and Displacement; Narmada and Tehri
2. Gender and Environmental Justice
3. Green Revolution; Biodiversity Loss; Species Extinction

Essential Readings and Unit Wise Teaching Outcomes:

Unit 1: This unit provides an overview of environmental historiography of the Indian subcontinent. The first rubric introduces the methods, theoretical concepts, sources, and the major sub-fields of environmental history. The second rubric explores how archeological records, literary sources, bio-mass, artistic depictions of nature, material cultural artifacts and oral history sources are integrated into environmental history narratives. **(Teaching time: 9 hrs. approx)**

Unit II: This unit gives a synoptic overview of human interaction with the animals, plants, and natural elements that sustained life. It shows how from the times of gathering, scavenging and hunting to the beginning of agriculture, humans adapted to the environment even as they tried to manipulate it, and maintained harmony with it and advocated conservation of earthly resources. **(Teaching time: 9 hrs. approx.)**

Unit III: This unit explores the patterns and processes of the expansion of agrarian landscapes, pastoralism and forest economies in India up to the eighteenth century. Providing an overview of the dynamics of human-nature interaction during the medieval times will help students to challenge the notions of considering pre-modern environments as a timeless continuum. **(Teaching time: 9 hrs. approx.)**

Unit IV: This unit explores how colonial capitalism as a powerful agent of environmental transformations made fundamental changes to the land use patterns and livelihood resources. The first rubric explores the environmental history of the colonial appropriation of forests as raw material for railways expansion and rivers as dams and other hydraulic infrastructures for industrial production and long-distance transportation. The second rubric elaborates how the colonial appropriation of water bodies and common lands through the new revenue policies, acts and regulations affected indigenous fishing and other livelihood patterns based on hydraulic resources. The third rubric elaborates the environmental problems of urbanization in the context of the colonial city of Delhi. **(Teaching time: 9 hrs. approx.)**

Unit V: This unit explains how the issues of development such as the construction of big dams and other mega infrastructural projects are often associated with displacement, biodiversity loss, species extinction, and how the industrialization of agricultural production transforms livelihood patterns and cultural landscapes. It offers a historical perspective on increasing the inequality of access to natural resources for women and the poor (**Teaching time: 9 hrs. approx.**)

History of India 1200 – 1550	4	3	1	0	12 th Pass	Should have studied History of India 750-1200

Learning Objectives

This course provides an analytical study of the history of India from 1200 to 1550 CE. It introduces students to a thematic study of the main aspects of the period delineating major transitions, changes and developments that include the establishment of the Delhi Sultanate, Vijayanagara and Bahmani, encompassing political, administrative, cultural and economic aspects. Through selected regional case studies it also underlines the inter-connectedness of the sub continental region in its transition.

Learning outcomes

After the successful completion of this Course, the students will be able to:

- Identify the major political developments in the history of India during the period between the thirteenth and the first half of sixteenth century.
- Outline the changes and continuities in the field of culture, especially with regard to art, architecture, Bhakti movement and Sufi movement.
- Discuss the economic history of the period under study in India especially, where agrarian production and its implications are concerned.
- Delineate the development of trade and urban complexes during this period.

DISCIPLINE SPECIFIC ELECTIVE COURSE (DSE -1): Environment in Indian History

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Environment in Indian History	4	3	1	0	XII Pass	NIL

Learning Objectives

This course aims to introduce the students to the major themes in the environmental history of the Indian subcontinent. A historically informed understanding on how the past societies shaped the natural world shall enable the students to critically situate the environmental issues that we encounter at present. The issues include global warming, contestation over natural resources, changing land use patterns, human interaction with other living species, impacts of agrarian expansion, ecological consequences of imperialism, impacts of mega infrastructure projects, urban pollution, emergence of environmental justice movements and environmental regulations, changing ideas about the natural world, and gendered dimension of environmental degradation. The course has the following broad objectives: a) to introduce the historical studies that explores the long-term trajectories of man-nature interactions and revises the political history-based periodization of the sub-continent's past as self-contained ancient, medieval, and modern periods; b) to introduce interdisciplinary approaches- cartographic, geological, zoological, ecological knowledges-that helps historians study the crucial role played by ecology in the shaping of the past societies; c) to familiarize the students to the methods of using archaeological, bio and geo-archival sources, artistic depictions and oral history sources to study the past relationship between humans and the natural world. By the end of this course, the students are expected to develop an in-depth understanding of the interdisciplinary approaches to historical thinking and the significance of the environment in human history.

Learning outcomes

After completing this course, students will be able to:

- Understand the historical methodologies and concepts to explain the environmental contexts of the past social and cultural transformations.

- Develop a historical perspective on the complex relationship between society and nature from prehistory to the present in the context of the Indian subcontinent.
- Discuss how societies developed technologies, sources of energy, and modes of organizing lives to adapt to varied ecological landscapes.
- Discuss environmental issues within a socio-cultural framework.
- Examine the social, political and economic contexts of creating inequalities in resource use, with reference to the case studies regarding water rights, forest rights, and the right to have livable cities.
- Locate solutions to environmental problems within a framework of greater democratization of resource use.

SYLLABUS OF DSC-1

Unit I. What is Environmental History

1. Historiography and Sources
2. Interdisciplinarity

Unit II. Living with Nature

1. Environment and Early Urban Societies: Harappan Civilization
2. Beliefs, Practices and Natural Resources

Unit III. Era of Major Agrarian Expansion

1. Pastoralism, Agrarian Expansion
2. Forests and Tribal Groups
3. Irrigation and Canals

Unit IV. Colonialism and Transformation of Nature

1. Changing Land Use Patterns; Railway and Deforestation, Dams and Hydroelectric Power
2. Inland Waterbodies and Fisheries
3. Urbanization and Environment; Delhi

Unit V. Development, Environment, and Migration in Contemporary India

1. Big Dams and Displacement; Narmada and Tehri
2. Gender and Environmental Justice
3. Green Revolution; Biodiversity Loss; Species Extinction

Essential/recommended readings

Unit I: This unit provides an overview of environmental historiography of the Indian subcontinent. The first rubric introduces the methods, theoretical concepts, sources, and the major sub-fields of environmental history. The second rubric explores how archeological records, literary sources, bio-mass, artistic depictions of nature, material cultural artefacts and oral history sources are integrated into environmental history narratives. **(Teaching time: 9 Hours approx.)**

Unit II. This unit gives a synoptic overview of human interaction with the animals, plants, and natural elements that sustained life. It shows how from the times of gathering, scavenging and hunting to the beginning of agriculture, humans adapted to the environment even as they tried to manipulate it, and maintained harmony with it and advocated conservation of earthly resources. **(Teaching time: 9 Hours approx.)**

Unit III. This unit explores the patterns and processes of the expansion of agrarian landscapes, pastoralism and forest economies in India up to the eighteenth century. Providing an overview of the dynamics of human-nature interaction during the medieval times will help students to challenge the notions of considering pre-modern environments as a timeless continuum. **(Teaching time: 9 Hours approx.)**

Unit IV. This unit explores how colonial capitalism as a powerful agent of environmental transformations made fundamental changes to the land use patterns and livelihood resources. The first rubric explores the environmental history of the colonial appropriation of forests as raw material for railways expansion and rivers as dams and other hydraulic infrastructures for industrial production and long-distance transportation. The second rubric elaborates how the colonial appropriation of water bodies and common lands through the new revenue policies, acts and regulations affected indigenous fishing and other livelihood patterns based on hydraulic resources. The third rubric elaborates the environmental problems of urbanization in the context of the colonial city of Delhi. **(Teaching time: 9 Hours approx.)**

Unit V. This unit explains how the issues of development such as the construction of big dams and other mega infrastructural projects are often associated with displacement, biodiversity loss, species ex-tinction, and how the industrialization of agricultural production transforms livelihood patterns and cultural landscapes. It offers a historical perspective on increasing the inequality of access to natural resources for women and the poor. **(Teaching time: 9 Hours approx.)**

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course
		Lecture	Tutorial	Practical/ Practice		
Politics of Nature	4	3	1	0	XII Pass	NIL

Learning Objectives

This introductory course familiarizes students with major themes in the history of human inter-action with nature. It studies the long-term transformations made by humans on their surrounding environment and the reciprocal effects of nature on societies. The themes include the inter-actions between humans and other living species, link between imperialism and environmental transformations, profligate use of resources, population growth, increasing urbanisation, carbon emission, and climate crisis. By focusing on the planetary scale of ecological interconnected-ness, the course enables students to understand the social, political, and cultural roots of the current environmental crisis. The course will also elaborate how the interdisciplinary approach enabled the environmental historians to arrive at new methodology in critically understanding the past. It integrates concepts and insights from Anthropology, Historical-Geography, Climate Science, Political Ecology, and Economics. The paper explains the politics of nature in terms of an increasing inequality in access to natural resources and the social responses to the unequal distribution of the effects of environmental degradation. Discussions on the politics of nature on a planetary scale will encourage students to innovate and suggest policy changes at the national and international level.

Learning outcomes

Upon completion of this course the student shall be able to:

- Discuss environmental issues within a social and political framework.

- Examine the role of social inequality. How does unequal distribution of and unequal access to environmental resources help understand the environmental crisis of the world - from the global to the local.
- Critique an understanding of environmental concerns based on a narrow scientific/technological perspective.
- Analyse the historical agency of animals.
- Understand how ideas about the environment have evolved in various socio-ecological contexts.
- Examine the complexities of resource distribution and inequalities of resource use, locating these within specific social contexts, with reference to case studies regarding the urban-environmental problems, industrial hazards and the environmental impacts of the mega-infrastructure projects.
- Locate solutions to the contemporary environmental problems within a framework of greater democratisation of resource use.

SYLLABUS OF GE-1

Unit I: Doing Environmental History

1. The themes of Environmental History.
2. Interdisciplinarity; Historical-Geography, Anthropology, Archaeology, and Political Ecology

Unit II: Societies and Natural Resources in the Pre-Modern World

1. Human-animal interactions
2. Pre-Industrial Prime Movers and Fuels

Unit III: Ecology and Imperial Power in the Early Modern World

1. The Columbian Exchange; Diseases
2. Colonialism and Natural Resources; Ecological Imperialism

Unit IV: The Worlds of Fossil Energy

1. Industrial Agriculture Steam Ships and Hydraulic Engineering
2. Cities and Environment; Delhi and Bombay

Unit V: The Great Acceleration and the Future

1. Carbon Emission and Environmental Justice; Climate Change
2. The Anthropocene Debate

Essential Readings

Unit I. This unit provides an overview of the major themes of environmental history and elaborates the interdisciplinary approaches developed by the environmental historians to study the past. **(Teaching time: 9 Hours approx)**

Making of Post-Colonial India	4	3	1	0	XII Pass	NIL

Learning Objectives

This thematic course introduces the students to various perspectives on India's evolving political, economic, social and cultural conditions from the 1940s to the 2000. The course intends to familiarise the students with some select themes pertaining to the gradual historical transformation of political organizations, the emergence of new forms of socio-political mobilization, the patterns of economic development and cultural representation and peoples' movements in the period under study.

Learning outcomes

The Learning Outcomes of this course are as follows:

- Draw a broad outline of the history of the early years of the Indian Republic, focusing on the framing of the Constitution, the integration of princely states, the reorganization of states and the features of our foreign policy.
- Examine critically patterns of economic development in the early years of Independence and the subsequent shifts and the persistent problems of uneven development.
- Trace a broad history of political organizations at the national level and political developments in the regional contexts.
- Examine issues of critical relevance with respect to the assertions and mobilization in the movements on the questions of caste, tribe and women.

SYLLABUS OF GE-2

Unit I: Laying the Foundation of the Nation State

1. Making of Indian Constitution and its salient features;
2. Integration of princely states, delineating provincial boundaries and the formation of newer states;

Unit II: Political Trajectories.

1. Politics and Political Parties: I. Congress hegemony and counter-hegemony, the rise of regional political parties; II. left political parties and Left wing political radicalism; III. J.P. movement / Nav Nirman movement, Emergency and Janta interregnum; and IV. Jansangh and Rise of the BJP.
2. Key features of the foreign policy of India.

Unit III: Socio-Economic Development and underdevelopment

1. Concept of planned economy and the key features of respective five year plans for agrarian, industrial and other sectors;
2. Shift from the model of mixed economy and public sectors to economic liberalization, privatization and globalisation;
3. Discontents amongst peasants and workers and the larger concerns of economic re-distribution, inequality, sustainability and environment.
4. Peoples' Movements for Rights, Liberation and Social Justice: Dalits, Adivasis and women.

Unit IV: Shaping a new public sphere and its discontents

1. Education, science and technology;
2. Language and Literature;
3. Cinema and visual art.
