

BEYOND THE TANK (BTT):

Along with making a social change, Enactus provide ample of opportunities to the non-members to participate and contribute towards our cause. Enactus annually conducts its Social Entrepreneurial competition. Here, we witness participation not just from the Delhi University but from various colleges across the country, since this competition involves devising an idea and presenting it through electronic mode. It becomes a hassle free and fun competition for the participants.

BTT 2021 was conducted from 13 Feb- 16 Feb 2021. It had 120 participants walking in for the first round and 30 participants making it to the second round. The participants came from various institutes like DU, IIM's, NIIT and various other reputed colleges of India. The academic and cultural diversity presented by the participants in their ideas and presentation were so well conceived that there were equally likely chances for the competition to end in dead heat, but the experience, subtleness and wisdom of our panel helped us to wade through the judging challenge and successfully finishing the competition.
