

Vision Document

2022-23

“To be an institution of repute, with a humane face, that is dedicated to academic excellence and social transformation by improving the quality of life of its students.”

- ❑ *Empower young scholars through capacity-building skills.*
- ❑ *Enable young minds to think, imagine, analyse, assess, and express themselves through activity-based learning*
- ❑ *Make the institution a viable intersection of academic excellence and moral values*
- ❑ *Help contribute to community development meaningfully and provide fair access to the poor and socially disadvantaged groups in the light of changing economic, social, and cultural developments*

Some Key Challenges:

- ❖ Improve Research Infrastructure and create Research Eco-system for socially relevant theoretical as well as application-based innovations
- ❖ Procure Enterprise Resource Planning system (ERP) in order to upgrade the existing internal procedures for better organization and data-collection
- ❖ Increase measures extension activities and community outreach in the neighbourhood of the institution
- ❖ Create employability for students through better learning opportunities with focus on skill-enhancement

Areas of Focus: Research

- Establishment of a Research and Development Cell to streamline research efforts by faculty and students.
- Expand the existing database of publication resources, financial assistance, scholarships, and fellowships available nationally and globally to further research of multiple nature in humanities, social sciences, and commerce.
- Provide financial incentive and institutional recognition to faculty members publishing in SCOPUS indexed journals.
- Organise seminars and workshops to familiarise students with the purpose and focus of the Memory Unit of the institution.

Areas of Focus: Internal Procedures

A customised ERP system to include the following:

- Admissions and related processes
- Teaching-learning and Assessment tasks
- Administrative procedures
- Accounts
- Teacher-Student Support
- Data management and organisation

Areas of Focus: Industry Outreach

With a recognition that the industries can act as the nucleus for the growth of an institution, the college intends to:

- Identify the domains of industries that can productively collaborate in the educational, research and corporate life of the institution
- Explore opportunities for greater engagement of the students with industrial enterprises for internships and related activities
- Find possibilities of resource generation through engagements with industries

Areas of Focus: Community Outreach

- The college will continue to strive towards defining an indispensable and distinct role for itself in the neighbourhood
- The many societies of the institution will expand their activities to provide a sustained and relevant interventions in the life of the larger community outside the college
- Community outreach is envisaged as an important way to apply the lessons of theoretical learning to real life problems and adapt the former to its praxis
- Lessons from community outreach will act as a channel of feedback to shape and sensitize the young minds within the institution to develop as more empathetic citizens of the nation.

Areas of Focus: Employability for Students

- The need to find greater opportunities for internships and practical training for career development
- Offer short term and certificate courses to train students in evolving areas of professional competencies
- Provide greater exposure to experts from various domains as professional role models

The End
