Undergraduate Programme Secretariat

Preamble

The University Grants Commission (UGC) has initiated several measures to bring equity, efficiency and excellence in the Higher Education System of country. The important measures taken to enhance academic standards and quality in higher education include innovation and improvements in curriculum, teaching-learning process, examination and evaluation systems, besides governance and other matters.

The UGC has formulated various regulations and guidelines from time to time to improve the higher education system and maintain minimum standards and quality across the Higher Educational Institutions (HEIs) in India. The academic reforms recommended by the UGC in the recent past have led to overall improvement in the higher education system. However, due to lot of diversity in the system of higher education, there are multiple approaches followed by universities towards examination, evaluation and grading system. While the HEIs must have the flexibility and freedom in designing the examination and evaluation methods that best fits the curriculum, syllabi and teaching-learning methods, there is a need to devise a sensible system for awarding the grades based on the performance of students. Presently the performance of the students is reported using the conventional system of marks secured in the examinations or grades or both. The conversion from marks to letter grades and the letter grades used vary widely across the HEIs in the country. This creates difficulty for the academia and the employers to understand and infer the performance of the students graduating from different universities and colleges based on grades.

The grading system is considered to be better than the conventional marks system and hence it has been followed in the top institutions in India and abroad. So it is desirable to introduce uniform grading system. This will facilitate student mobility across institutions within and across countries and also enable potential employers to assess the performance of students. To bring in the desired uniformity, in grading system and method for computing the cumulative grade point average (CGPA) based on the performance of students in the examinations, the UGC has formulated these guidelines.

CHOICE BASED CREDIT SYSTEM (CBCS):

The CBCS provides an opportunity for the students to choose courses from the prescribed courses comprising core, elective/minor or skill based courses. The courses can be evaluated following the grading system, which is considered to be better than the conventional marks system. Therefore, it is necessary to introduce uniform grading system in the entire higher education in India. This will benefit the students to move across institutions within India to begin with and across countries. The uniform grading system will also enable potential employers in assessing the performance of the candidates. In order to bring uniformity in evaluation system and computation of the Cumulative Grade Point Average (CGPA) based on student's performance in examinations, the UGC has formulated the guidelines to be followed.

Outline of Choice Based Credit System:

- 1. Core Course:** A course, which should compulsorily be studied by a candidate as a core requirement is termed as a Core course.
- 2. Elective Course:** Generally a course which can be chosen from a pool of courses and which may be very specific or specialized or advanced or supportive to the discipline/ subject of study or which provides an extended scope or which enables an exposure to some other discipline/subject/domain or nurtures the candidate's proficiency/skill is called an Elective Course.
 - 2.1 Discipline Specific Elective (DSE) Course:** Elective courses may be offered by the main discipline/subject of study is referred to as Discipline Specific Elective. The University/Institute may also offer discipline related Elective courses of interdisciplinary nature (to be offered by main discipline/subject of study).
 - 2.2 Dissertation/Project:** An elective course designed to acquire special/advanced knowledge, such as supplement study/support study to a project work, and a candidate studies such a course on his own with an advisory support by a teacher/faculty member is called dissertation/project.
 - 2.3 Generic Elective (GE) Course:** An elective course chosen generally from an unrelated discipline/subject, with an intention to seek exposure is called a Generic Elective.

P.S.: A core course offered in a discipline/subject may be treated as an elective by other discipline/subject and vice versa and such electives may also be referred to as Generic Elective.
- 3. Ability Enhancement Courses (AEC)/Competency Improvement Courses/Skill Development Courses/Foundation Course:** The Ability Enhancement (AE) Courses may be of two kinds: AE Compulsory Course (AECC) and AE Elective Course (AEEC). "AECC" courses are the courses based upon the content that leads to Knowledge enhancement. They ((i) Environmental Science, (ii) English/MIL Communication) are mandatory for all disciplines. AEEC courses are value-based and/or skill-based and are aimed at providing hands-on-training, competencies, skills, etc.
 - 3.1 AE Compulsory Course (AECC):** Environmental Science, English Communication/MIL Communication.
 - 3.2 AE Elective Course (AEEC):** These courses may be chosen from a pool of courses designed to provide value-based and/or skill-based instruction.

Project work/Dissertation is considered as a special course involving application of knowledge in solving / analyzing /exploring a real life situation / difficult problem. 'The Individual and Society' Concept Note

This course makes the assumption that literature is an important and relevant way of making sense of the world we live in, though literature employs myth, metaphor, fictional characters, irony, rhyme, and other devices of language that might not be seen as legitimate in more 'scientific' subjects. By these means, literature can, for example, enable the reader to identify temporarily with people from other cultures and backgrounds, and offer an 'experience' of being a Dalit boy rejected by a school (Valmiki's *Jhootan*), or a Black African rejected as a tenant by a white landlady (Soyinka's *Telephone Conversation*) – and an opportunity to compare the two. Discussion of one text in the light of other texts is an important part of this course. For example, several of the chosen texts vividly illustrate the socialization of the girl child into roles acceptable to a patriarchal society and show this same phenomenon occurring in widely different cultures – inviting revealing comparisons. At least two pieces use poetic language and irony in very quiet ways to make a devastating criticism of the unnaturalness of war. We expect students to discuss how the use of language and choice of genre affect the writer's meaning and the reader's response.

We deliberately chose texts from widely different backgrounds precisely because we wanted the student to appreciate the ways in which his or her situation is comparable or analogous to the experiences of other races, classes or nationalities. We also strongly felt that though our students are Indian, They cannot possible be untouched by western and other cultural influences, and since we live in the so-called 'global village' the essays and stories selected should reflect that reality. We have chosen 29 writers in all in this paper and 13 of them are from the Indian subcontinent. Nearly all are twentieth century authors as their themes and experiences are closer to the students' world.

The course comprises fictional writing, essays of different types and styles, and poems. It is arranged according to themes that we thought would not only be of interest and relevance to students but would be similar to those likely to appear in the new courses of other disciplines. But where a Sociology or Political Science course would handle 'Gender', or 'Race', etc., according to the specific approaches of those disciplines, our course would bring these concepts to life for the students by literary means and thus reinforce and deepen the impact of the other courses he or she may be studying.

THE COURSE

The course will consist of an anthology, *The Individual and Society*, comprising a wide selection of poems, short stories and prose pieces. These have been grouped under four broad themes: Caste/Class; Gender; Race and Violence and War. Readings will comprise 110 – 120 pages.
