II. INTRODUCTION TO CHOICE BASED CREDIT SYSTEM

SCOPE

The Choice Based Credit System (CBCS) provides an opportunity for the students to choose courses from the prescribed courses comprising core, elective/minor or skill-based courses. The courses can be evaluated following the grading system, which is considered to be better than the conventional marks system. Grading system provides uniformity in the evaluation and computation of the Cumulative Grade Point Average (CGPA) based on student's performance in examinations which enables the student to move across institutions of higher learning. The uniformity in evaluation system also enable the potential employers in assessing the performance of the candidates.

III. PUNJABI PROGRAMME DETAILS:

PROGRAMME OBJECTIVES (POS):

The dawn of the 21st century and third millennium has, hopefully, ushered in an era qualitatively different from the earlier ones in terms of foundational postulates, value systems, mindset and life styles. Higher education in the present century comes face to face with challenges, new tasks and new opportunities. As a significant means of development of human resource, education will have to play a significant role in shaping the 21st century society and the third millennium civilization. The process will affect not only the market economy of the nation as a whole, but also the whole system of higher education, which has to prepare its Graduates and Post-graduates for participation in the social and the economic development of the country, and the type of the cultural environment and ethics it will need to foster. Information technology is further contributing to this dynamic change and will have major impact on the structure, management and mode of delivery of the educational system.

All of us are conscious of the fact that through the process of crisis in higher education, several crucial areas have emerged in which the university system has to re-examine itself and its relationship with social and economic development. These include the relevance and quality of education, the gradual process of internationalization of education as not only students and faculty cross borders but even the system of education are doing so. There is also a concomitant demand for accountability.

The department of Punjabi with its Post-graduate programme, intends to preserve further and disseminate the various aspects and forms of ancient Indian knowledge traditions in modern perspectives. The programme aims at equipping enabling future researchers with the fundamental concepts, theories and practices of different knowledge domains. To empower the students with modern and scientific tools, inter-disciplinary approach and to design such modules to help them in becoming good citizens are some of the main objectives of the course.

The syllabus of M.A. (Punjabi) was revised and restructured earlier in 2004 AD and again revised/redesigned incorporating credit scheme, inter-disciplinarity and optional subjects under semester system in 2009 AD. As per the new guidelines of CBCS and requirement of the University, this syllabus has been again revised, redesigned and restructured with a futuristic approach, keeping in mind the new challenges of Globalisation and Post-situations.

PROGRAMME SPECIFIC OUTCOMES (PSOS):

After completion of Post-graduate degree in Punjabi, the candidates will become masters in different fields of Punjabi, Language, Literature and Culture.
